

## Extended capacity

We are able to manufacture precision spur gears from 0.2 module (150 DP) 0 to 3.0 module (9 DP) and size from 5mm to 350mm diameter.

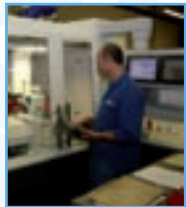

In addition we manufacture helical gears, worms & wheels, racks and bevel gears.

We have high speed CNC facilities for:

-  Gear cutting
-  Mill/turning
-  Grinding
-  4 Axis machining centres

## Location

Muffett Gears are located in extensive modern facilities at Tunbridge Wells, close to the A21 and the national motorway network giving easy access to both London and the Channel crossings.

## Geared for precision technology

Precision engineering for gears, gearboxes, assemblies and components

[www.muffett.co.uk](http://www.muffett.co.uk)

## A history of excellence

Established in 1920, Muffett Gears is synonymous with the manufacture of gears, gearboxes, precision assemblies and components.

Muffett Gears is currently enjoying its third generation of family ownership and has long been at the forefront of gear technology and continues to look to the future through investment apprentices, training and the latest machinery.

Through our extensive experience – in materials, manufacturing processes, production, assembly and integrated quality systems, Muffett Gears continues to expand the boundaries. We look for new and creative ways to reduce costs, enhance performance and exceed our customers' expectations.

From concept to execution, Muffett Gears manufactures precise and reliable geared solutions when you need to control speed, torque, motion and position. We have over 80 years experience in supplying to exacting specifications and tolerances.

## Our gears work for you

At Muffett Gears we have been achieving the highest possible standards within precision engineering for over 80 years. During this time we have serviced the needs of a wide range of sectors including:

- Medical
- Aerospace
- Marine
- Film and TV
- Motorsport
- Hydraulics
- Scientific
- Model Engineering

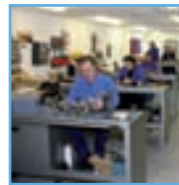

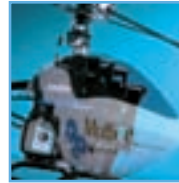

### Assembly

Our recently extended Assembly Department is fully equipped to meet your electro/mechanical assembly requirements.

### Quality

Muffett Gears are approved to ISO 9001:2008 and is currently undergoing approval to aerospace standard SAE AS 9100.

Our inspection equipment includes both CMM and CNC single flank tester.

### Standard products

As well as manufacturing to customers' requirements, Muffett Gears have an extensive range of standard products available from stock.

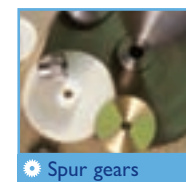

• Bevel gears

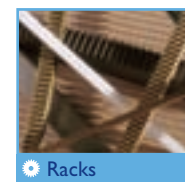

• Bevel gearboxes

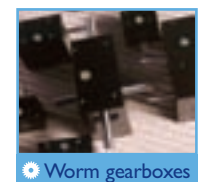

• Moulded gears

• Spur gears

• Racks

• Worm gearboxes
